THE New Series Pontiac ■ Big Six is called "a finer car with a famode name."

This means that the intrinsic value for which Pontiac has has always been famous reaches new heights in the New Series Six. It means that new-type rubber engine supports make Pontiac's big, 60-horsepower engine smoother than ever. It means that a new steering mechanism, acting on roller bearings, gives Pontiac still greater ease of control. Its big, improved, internal, nonsqueak four-wheel brakes are now safer and more dependable than ever. There is smart new styling in its bodies by Fisher. It has a new sloping windshield that lessens headlight glare. And improved Lovejoy Hydraulic Shock Absorbers, at no extra cost, give big car riding ease.

If you are in the market for a low-priced six that combines fine performance and attractive style with assurance of enduring satisfaction-do not fail to see the New Series Pontiac Big Six-a finer car with a famous name!

Prices, \$745 and up, f. o. b. Pontiac Mich., plus delivery charges. Shock absorb ers standard equipment. Bumpers and sprim covers at slight extra cost. General Motor. Time Payment Plan available at minimum

### Bring Home the Bacon

The man who always comes home with the bacon Knows what he's about, is seldom mistaken. He may not live in the greatest style, But he gets what he needs that's really worth while, He always has money saved up in advance, Keeps his eye open, looks for the main chance. Some people may wonder how he gets along; It's saving his money, not doing things wrong. The HONDO STATE BANK now has his account; It runs into figures, is quite an amount.

(Copr. 1927 Adam Brown Hunter) HONDO STATE BANK

### All these added improvements -yet prices greatly reduced?

The new Chevrolet Six is enjoying the greatest public reception ever given a Chevrolet car. For it offers scores of new improvements and refinements that make it a finer car in every way. Yet it sells at greatly reduced prices!

Consider a few of the extra-value features that Chevrolet has incorporated in this greatest of all Chevrolets -a smoother, flashier six-cylinder valve-in-head motor, with its capacity increased to 50 horsepower!

-a stronger, more durable rear axle, with increased gear ratio!

-four Lovejoy hydraulic shock absorbers-assuring a smooth, even, comfortable ride over any road!

-weather-proof internal-expanding four-wheel brakes, with front and rear drums tightly enclosed!

-larger full-balloon tires, a new clutch and a stronger transmission!

-quieter, stronger, more beautiful Fisher bodies - with richer upholsteries, more distinctive colors, and wider, deeper seats!

Every factor has been considered that would add to the safety, comfort and convenience of the Chevrolet owner.

Come in today. See this greatest of all Chevrolets! Check over its new features. Drive it. You'll find quality you never thought possible—at such greatly reduced prices!

STABILIZING THE DOLLAR.

What are we to do when whole crowds of law makers "go batty" on a question, and spend immense time and money trying to do the impos-

By P. A. Spain

The committee on banking and currency in congress are doing that very thing, and have been for two or three years. They have used the public money to print, I presume, several thousand volumes of 1600 pages each, called "hearings" on the question of "stabilizing the dollar."

They are wanting to do something to make the gold dollar buy the same amount of any given article all the time, and yet they say they must avoid everything that tends to fix prices of anything. They are too "bumfuzzled" to know that such a thing is an impossibility. I presume what they really want is to give more power to the gold owners.

They do not realize that trade or exchange is a "teeter board" with money on one end, and commodities on the other, and one cannot become fixed without the other becoming fixed. They do not seem to realize that the only way to fix the price of the dollar is to fix the price of a number of other important articles.

They talk a great deal about "stabilizing the general price level," but nowhere in their discussions, do we find it intimated that this can only be done by price fixing of individual products.

They are chasing the chimera of a "stable dollar," and do not seem to once conceive that back of such a thing lies the fixing of the price of such things as wheat, cotton, corn and labor. The discussions as printed, do not bear the stamp of a clear insight into the questions considered.

As the matter now stands, the weight of the dollar in gold is fixed as 23.22 grains, but the weight of the dollar in any other commodity has never been fixed. Our government has erroniously allowed the gold owners to issue and distribute all money; hence, they have power to manipulate prices of all other commodities up or down as their greed demands; and hence the public is annually robbed by money sharks.

#### SAYING IT IN PLAIN ENGLISH

In a recent interview with the New York Times, Alfred E. Smith shows the difference between administration of business affairs and government affairs. "It's much easier to run any organization by common sense that it is by law," says Mr. Smith. "The head of a business makes up his mind to do something. He says, 'Go ahead and shoot,' and the thing is done. But it's a very different thing in public office.

"A certain friend of mine, employed by a big corporation, came up to Albany while I was Governor and put up an entire building while the State was digging foundations for one that was absolutely needed to carry on the State's business. Why was that? Because every time he wanted to do something he did not have to send over to the Attorney General's office to find out whether he had a legal right to do it. In ervone is working for the benefit of the concern; there are no legislators of different parties who selfishly retard measures for improvement in order to advance their own ends."

So long as public officials seek votes and are responsible to no one, we shall have waste and inefficiency when government goes into business.

Progress is the result of individual genius and responsibility. America has grown with a maximum of business freedom and minimum of government.—Selected.

To the which we would only emphasize the moral-keep the government out of private business.

# IMMIGRATION LEGISLATION

By HARRY L. SEXTON

The Mexican immigration issue, vitally affecting the interests of South Texas, was again brought to the front in congress last week by the introduction of two bills, both designed to restrict immigration from the Latin-American countries to a very limited number.

One measure, introduced by Representative Albert Johnson of Washington, proposes a quota established upon a trade basis-the admission of three aliens for every American citizen who emigrates to these coutries of which such aliens are citizens. The second measure, introduced by Representative John Box of Texas, proposes a 3 per cent quota. Enactment of either measure would result in serious curtailment of the supply of Mexican labor coming across the bor-

Under the "three-for-one" trade provision of the Johnson bill only 2,175 Mexicans would be permitted to enter the United States during the fiscal year, the records of the Labor Department showing that only 725 Americans entered Mexico last year with the intention of making their permanent home in that country. Immigration form the West Indies would be restricted to 1,548. As 16,889 Americans emigrated to Canada last year, the quota for that country would be fixed at 50,667 as compared with 4,940 for all Latin-American countries.

The Box bill proposes a 3 per cent quota with a maximum of 50,000 from all countries on the Western Hemisphere. On this basis the quotas from the Latin countries would be greater than under the Johnson bill, and the Canadian quota reduced. However, under this measure the immigration from south of the Rio Grande would be reduced materially.

Few border residents realize the wide scope and intensity of the campaign of propaganda which has been in progress in the North and East in recent years with a view of restricting Mexican immigration. Organized labor and organized agriculture have been especially active, and various religious organizations and so-called "patriotie" societies also have taken a hand. Many of the industries which have been unsuccessful in recruiting labor from the border country have added the weight of their influence.

Mexican laborers who have been brought into the Northern and Eastern industrial areas through the activities of labor agents are very largely responsibile for the protests of organized larbor. The fact that the labor agents impose upon the credulity of only the least intelligent If the tariff were effective, wheat

class of Mexican immigrants has resulted in bringing into the Northern area only the most undesirable, and Northern and Eastern people are prone to class all Mexicans in the same category.

The National Grange and many

other farm organizations have joined with organized labor. The basis of their complaint is that South Texas producers of staple crops are in position to secure a cheaper and more adequate supply of labor than those of other sections, maintaining that they are thereby placed in a position to produce more cheaply than the Northern farmers. The attitude of

many of the religious organizations is based upon the fact that the ma-jority of Mexican immigrants are Catholics, and the so-called "patriotic" organizations are demanding restriction upon the ground that Latin Americans are "unassimiable."

The movement toward restriction of Latin American immigration is expected to have the staunch support of the Department of Labor, and it is believed, will be vigorously opposed by the State Department and the Department of Commerce. The public will hear little of this opposition as it will be presented in the committee room and will not be ac-

would be 42 cents a bushel higher in

bushel lower in Kansas City than in

Winnepeg and 21 cents lower than

companied by the sensational publicity which has marked the efforts of the restrictionists to arouse publie sentiment in favor of the quota The State Department is cognizant

of the fact that application of a quota in any form is certain to arouse the resentment of the Latin-American countries and will lead to many complications. The Department of Commerce is cognizant of the fact that Latin America offers for American industry the largest and most profitable field for development of commercial relations and that to arouse the resentment of those countries will result in reprisals against American industries, greatly desired by the German, French and English industrialists who are making a hard fight for the Latin American busi-

Whether the influence of these departments is sufficient to offset that this country than in Canada or Great the Labor Department and the various organizations demanding re-But the market reports show May striction remains to be ascertained. wheat selling at \$1.27 a bushel in Kansas City, \$1.45 in Winnepeg, Canada, and \$1.48 in Liverpool, Eng-It is obvious it will receive an overwhelming vote in both houses, as the intensive propaganda for restriction has created such wide-spread public sentiment that it would be political and. Thus instead of wheat being 42 cents a bushel higher in the Unit-ed States, as it would be if the tariff suicide for the majority of members on it were effective, it is 18 cents a to oppose it.

Despite the fact that figures submitted by the immigration bureau of the Department of Labor show that under the present enforcement measures which went into effect March 4, immigration from Mexico for the nine-month period from March 1 to November 30, 1929, was only 17,204 as compared with 44,122 for the same period in 1928, the ultra-restriction leaders are almost fanatical in their views, maintaining that the Mexican is a menace to American institutions, completely ignoring the fact that many of the leading citizens of South Texas are of Mexican parentage and that without the aid of Mexicans development of the most productive areas of the Southwest would have been impossible.

### A CALL TO ARMS

BY JOHN E. RANKIN, M. C.

To the farmers of America:

The fight is now on for real Farm

The question has been stripped of all camouflage and the issue is now squarely before Congress, and the

The fate of American agriculture is now at stake, and may be determined within the next sixty days. Within that time Congress, and the

President, will decide whether we are to carry out the promises made by both major political parities in the last campaign to put argiculture on equality with industry or whether we are to shut the door of hope in the farmer's face and leave him to endure indefinitely the economic disadvantages from which he is now suffering.

The Senate has performed a great

It has written into the tariff bill the debenture amendment, which, if accepted by the House and the President, will come nearer placing agriculture on equality with industry than it has been for more than sixty years.

This debenture amendment would give agriculture the benefit of the tariff. It would raise the price of wheat 21 cents a bushel, that of corn 121/2 cents a bushel and that of cotton 2 cents a pound, about the world price.

It is the only possible way to give the producers of those commodities the benefit of the tariff. It is the only way to make the tariff on them effective.

For instance, we have a tariff now of forty-two cents a bushel on wheat.

Liverpool. And even at Minneapolis and Chicago it was selling on the same day at \$1.34, or 11 cents under Winnepeg, just across the line, and 12 cents under Liverpool

The tariff commission made a thorough investigation last year of the cost of raising wheat in this country and in Canada, and reported to the President that it costs 42 cents a bushel more to raise wheat the United States that it does in Canada; hence the tariff on wheat was raised to 42 cents,-on paper.

Now, if it costs 42 cents a bushel more to raise wheat in Kansas than it does in Canada, as the investigation showed it does, and wheat is 18 cents a bushel higher in Canada than in Kansas, then the Canadian farmer is making 60 cents a bushel more profit on his wheat than is the farmer in Kansas.

The farmer is not asking for a bounty. All he wants is justiceequality with industry under the tariff, so long as we have the present tariff laws.

The debenture would make that tariff effective on agriculture and would give the growers of wheat, corn and cotton the benefits of the tariff now enjoyed by industry .

### GOOD ADVICE FOR ANYBODY.

. . . When farmers, or any other

class of people, depand most upon themselves, working to better themselves and the conditions surrounding them, they become strong,' says the Jacksonville, Florida, Times Union. "On the other hand, when they lean on others, or on Congress, seeking help from others, rather than doing what they can to help themselves, they become weaklings and give utterance to cries of distress.'

#### THE HIGHWAY GRAFT.

For several years, the United States Congress has been appropiating \$75,000,000 per year for building highways in the various states.

Press reports indicate that the Association of State Highway Officials, is now asking Congress to increase this appropriation to 125 millions a year. The present law requires that the State shall furnish any given amount it desires, and the U. S. Treasury will furnish an equal amount in completing any proposed road project.

In other words, if congress allows this increase, then the various states can issue bonds and borrow 125 milissue bonds and borrow another 125 millions, and the total 250 millions can be spent in the United States each year in building National highways. This does not include the bonds issued by counties or districts for local highways.

The good roads are all right, and should be built, but did you know that this Federal Highway Aid proposition was just another scheme of idle money lords for oppressing the American producing people and their unborn children by the process of interest taking. The roads should be built with Government money issues, which would not need to draw interest, but they should not be built as at present, with borrowed private bank money, which usually draws interest at 5 per cent or more.

Many people do not stop to think that the Government borrows its 125 millions which it proposes to match up against the 125 millions borrowed by the states. Many people do not know that the people of the states are taxed by both the f deral governpay the whole 250 millions, plus a heavy interest toll.

Some are led to believe the 125 government, is a mere gift to the

each 250 millions borrowed on 5 per cent 40-year bonds becomes 750 millions in the hands of the lenders. One writer a Beekeepers' Item in by maturity, and a 10-year batch of

Congress should issue government money to the states themselves, in-I understand that bees will be stead of issuing it to money lenders,
